Professional Experience

Co-operators General Insurance Company

Data Engineer – Analytics Tools & Data Warehouse

Guelph, Ontario

Jun 2022 - Nov 2024

- Resolved 96% of incidents within standard Service Level Agreement (SLA) during on-call rotations (**ServiceNow**)
- Collaborated with cross-functional teams to migrate databases using **SSMS**, **Java**, and **Azure Data Factory** working with **Azure Synapse** and **Oracle SQL Server**
- Documented 200+ ETL processes in Informatica Cloud and ADF and created dashboards for efficient incident resolution
- Developed **ETL pipelines** in ADF using **Python** and **Java** processing 300+ data entries daily; improved efficiency by 35% in large volume ETL jobs using multithreading
- Developed and maintained dashboards to provide stakeholders with real-time visibility into ETL process performance and status
- Managed and monitored **Change Data Capture (CDC)** processes using **Qlik Enterprise Manager**, ensuring seamless data replication and synchronization across **SQL Server**, **Azure Synapse Analytics**, and **Informatica** while maintaining high availability and data integrity

Systems Developer – Guidewire

- Collaborated with QA and business analysts to develop test cases, reproduce issues, and implement bug fixes across ClaimCenter environments
- Developed **Gosu** code to streamline insurance processes and improve efficiency in ClaimCenter; data validation accuracy improved 15% with zero critical defects
- Customized user interface components and claim screens using PCFs (Page Configuration Files) to streamline adjuster workflows and improve usability.

Co-operators General Insurance Company

Software Engineer – Python/.NET/UiPath (Intelligent Automation Team)

Guelph, Ontario

Jan 2021 - Aug 2021

- Re-designed a large transactional automation process increasing the success rate from 30% to 96%
- Developed libraries to standardize tracking metrics and improve reliability; 99%+ reliability for metrics
- Developed attended and terminal automations using **UiPath**, **C#**, **.NET** and **Python**; 800+ hours saved
- Managed user roles, processes, schedules and configuration changes as a UiPath Administrator
- Implemented the automation documentation standard for Robotics Process Automation.

Co-operators General Insurance Company

Robotics Process Automation (RPA) Developer - eRPA Enterprise

Guelph, Ontario

Apr 2019 - Aug 2020

- Designed and developed automations that saved 2,900+ manual hours using **UiPath**
- Maintained high success rates by solving critical errors and maintaining compatibility through system updates for automations migrating 100,000+ entries
- Visualized ROI metrics using **Kibana** dashboards and **ElasticSearch**.
- Managed the end-to-end stakeholder lifecycle for RPA initiatives, translating complex business requirements from senior management into technical specifications while providing regular progress reports and ROI analysis.

Education

University of Guelph

Bachelor's (Honours), Computer Science

Sep 2017 - Apr 2022

GPA: 3.5

- Graduated with Distinction, on the Dean’s List
- Statistics minor

Projects

Cephalon

2025-2026

- Architected and deployed a privacy-first, fully local Retrieval-Augmented Generation (RAG) desktop application using Tauri, React, Rust, and a **FastAPI** Python backend.
- Engineered a lightweight, standalone Machine Learning engine by migrating from **PyTorch** to **ONNX** Runtime, drastically reducing the compiled application size and memory footprint.
- Designed a high-precision, two-stage hybrid retrieval pipeline using **LanceDB**, combining an ONNX-optimized Bi-Encoder for 768-dimensional vector search with a Cross-Encoder for surgical result reranking.
- Implemented dynamic, offline LLM inference using llama.cpp with Vulkan GPU acceleration, featuring a custom VRAM manager for seamless hot swapping of .gguf models directly through the UI.

Technical Skills

Languages: Java, C#, .NET, Python, JavaScript, R, PowerShell, C/C++, SQL (T-SQL, MySQL, PostgreSQL, PLSQL)
Backend and Dev Tools: AWS, Google Cloud Platform, Git, Windows, Linux, Kibana, Elasticsearch, REST APIs, FastAPI, SOAP, jQuery, Docker, Node.js, Express.js, Azure (Data Factory, Synapse), Excel, Informatica Cloud, Snowflake, Qlik Enterprise Manager, Microsoft SQL Server Management Studio (SSMS), Oracle SQL Developer, Visual Studio Code, UiPath, regex, LanceDB (Vector Databases), Bash, YAML, Tableau, PyTorch, Kubernetes, PowerBI, vLLM, AI tools (ChatGPT, Claude, Gemini, Co-pilot)
Frontend: jQuery, Angular, TypeScript, HTML5/CSS3, React.js, Tauri
Certifications: Microsoft - Azure DP-900, Databricks - Databricks Lakehouse Fundamentals
